

NEW FOR 2009

THE RETURN OF TWO FAVOURITES AND A CLEVER LITTLE BUOY

Fi-CLOR NON-CHLORINE SHOCK

- Breaks down pollutants in pool water
- Restores sparkle to cloudy water
- Shock doses without raising chlorine
- Ideal for pools with automatic covers

Fi-CLOR CHLORINE/BROMINE REDUCER

- Corrects excessively high chlorine or bromine levels
- No need to replace heated pool water
- Rapid dissolving
- Fast acting

Fi-CLOR MINI-BUOY

NEW for 2009 is this clever little Mini-Buoy, a small pool floating dispenser suitable for pools from 10m³ to 30m³.

Fi-Clor Mini-Buoy will provide a constant input of 'background' chlorination for 1 to 2 months. Acting in the top few centimetres of the pool water where pollution is greatest, it minimises the risk of bacterial and algal infection. It's ideal for regular use in conjunction with other Fi-Clor chlorine sanitisers or for periods when the pool is not in use (eg when on holiday).
